*Applied freehand to the surface of the hair to create texture and frame the face, this multi-tonal effect gives the ultimate sun-kissed or dramatic look to natural or pre-coloured hair.*

### **What is the difference between highlights and balayage?**

*Balayage/Ombre in the traditional form is known for producing natural results – colour is often softer at the root area and brighter towards the end. It is great for lower maintenance hair colour or adding subtle soft hints. Highlights using a foil/mesh will give you maximum lift and high definition colour. This is perfect for anyone who is looking for bright, highly visible colour. If you want to see contrast and high definition colour, then foils are for you.*
